

Constellation DAO

Town Hall Meeting
May 11 2022

Welcome Genesis Members!

198 people strong

Season 0 started April 26th

Today's agenda

- Mission & Values
- Election results
- Getting things done with bounties
- Mint status - Tak
- Constellation Fund status - Tak
- What's going on with other DAOs? - Matt V
- Q&A

Charter Mission

Constellation DAO helps Techstars alumni succeed as entrepreneurs by helping each other find paths to success.

Charter Vision

Constellation is a DAO that lets Techstars alumni invest in each other, explore and deepen connections and resources through our networks, and support each other's well being.

Election results

Thanks to everyone who voted!

Treasury committee - Tak, Josh, and Dan

Governance committee - MG, MattJ, May

Programs committee - Brian, Ewal, Todd

Bounties

If a DAO is decentralized, who does the work? Everyone is busy!

Bounties are incentives used to reward members for doing key tasks.

E.g. build a website, run a PR campaign, host an IRL event

Work paid in tokens and members vote on results

Plan is to launch bounties using <https://dework.xyz/>

Launch bounties

Initial bounties will be around a public announcement date that is TBD.

Could include:

- Website creation
- Social media campaign
- PR campaign
- NFT art design
- Recruitment campaign for Season 1 (Oct 26 2022)

Mint status

How do we pay in tokens?

We mint them!

First mint is planned for \$date

NFT mint is planned for \$date2

Fund status

Structuring:

- Talked to LPs from the Constellation DAO
 - <https://i77cy7vkuix.typeform.com/CXNDAO>
- Angellist setup = Delaware entity as a sub manager
- Signed Angel List Lol

Filecoin Accelerator

- Mentor madness: 6 companies
- Had companies involved from hardware protocol, more collaborative and user friendly browsers, to play to earn consumer plays
- Most have raised a round already
- Talking to the MD this Saturday

What's going on with other DAOs?

Matt V?

Q&A

What's the difference between the NFT that a DAO issues to members, and the tokens that they also issue?

What is a bounty? How to I make or complete one? Do you have good examples of what a bounty is & can be?

What are the different layers people are talking about 1,2,3

What is token-gating, why would I care about having a genesis NFT
