What is a Bounty?

Compensation for performing a task which adds value to the DAO.

- Often created & assigned by a committee
- Paid in any on-chain token, most often in the DAO's native token
- An opportunity to establish portable credentials & a portfolio of work

Example Bounty

CXN is Usings Dework.xyz

A Web3-native “Trello”

- Handles all logistics
- Several Integrations

All for Climate DAO / Writers for Climate / #60

Write a story about Bloomeria

Write a story on mirror.xyz (will be published on the allforclimate publication and on your own mirror).

Goals:

- Get people to know about a project that has been raising money on a past Gitcoin Climate Round
- Learn about their mission, what they've done so far with the money raised, what they've learned, their needs, how can people contribute

Requirements:

- Get at least one pull quote from one of the core contributors
- Get some stats (number of contributors, total raised, total spent)
- Get some images and/or videos
- Add links to learn more, donate, contribute, join

CXN Fund Status

- Angellist documents reviewed and signed
 - They are structuring as of now, have Delaware entity set up
 - Plan is to close on this before PR goes live to capture interest
- Aiming for \$10mn fundraise
- Have mainly two metrics to target: \$\$ amount and DAO participation as a %
 - The fund's 20% token pool will be used to incentive both metrics
 - Incentive tokens for early committers (tokens for every \$ raised)
 - Bonus tokens to all for DAO participation % (extra token pool pro rated)
- Need to start developing deck
 - If anyone has a Techstars fund deck

Q&A / Further Discussion

Vision Statement

Orange DAO

Constellation is a DAO that lets Techstars alumni invest in each other, explore and deepen connections and resources through our networks, and support each other's well being.

We believe that founders and builders are best suited to spark, advance, and distribute opportunities to anyone hungry for a fairer future. And that the Y Combinator ecosystem will continue to draw the best founders in the world.

Once in a generation, an opportunity will appear that will change much of what we know about the world, business, and how people interact. We believe that the crypto economy — broadly described as Web3 and the technologies that enable it — is that opportunity.

This opportunity can distribute wealth, access to power, control over resources, and participation in governance, to a broader group of people than ever before in a more equitable way than any previous systems.

Mission Statement

Constellation DAO helps Techstars alumni succeed as entrepreneurs by helping each other find paths to success.

Orange DAO exists to support past, present, and aspiring Y Combinator founders who are building the future of the crypto ecosystem. We will distribute: wealth, knowledge, access to power, control over resources, and participation in governance, to a broader group of people than ever before in a more equitable way than any previous system.

We will become the most valuable and sought-after crypto founder community by investing our experience, capital, and attention in people, organizations, and networks that share our vision.

Orange DAO will help startups apply to, and be accepted into Y Combinator, provide them with pre- and post-YC funding, while helping mentor their leadership and recruit talent, and acquire customers. And we will do it responsibly and equitably by becoming a DAO governed by its members because our hive mind is greater than any single ape brain.
